

Gotcha

Find it quick or find it fast. Either way, DataRealm Software's Laboratory Information Management System, DW LIMS, will improve your gotcha rate by giving you efficient access to sample records and information. DW LIMS automates every aspect of the sample management life cycle so you can reduce management time, end frustration and have precise records.

Life is a lot easier when you can sit back and say "Gotcha," rather than "Where is it?" Our solution works and fits your budget. Ask us to *prove it*. For more information visit www.dwlms.com or call 519 253 1607 ext. 141

DW LIMS knows how to get along with other applications. No need to change everything. Cooperation rules.
